

JEFFREY KEMP PROFILE

Jeffrey Kemp has been using Oracle SQL and PL/SQL since 2000, and has been publishing at jeffkemponoracle.com since 2005. He is not a DBA but enjoys pretending to be one. He is passionate about the Oracle database, Oracle Apex, and Farmer's Union Iced Coffee.

Title: Top 20 Gotchas with Old Database Versions

Abstract: Tired of the clichéd "Top 10 New Features" talks? Forced to work on that old 8i or 9i database? There's some gotchas to look out for. This is one presentation with something for everyone - a nostalgic look into the past for the oldies, plus potentially valuable and time-saving tips for newbies to the Oracle world.

Pre-Requisites: Familiarity with SQL and PL/SQL; An unhealthy interest in antique software
